INTRODUCTION

The Blockchain technology allows us to ensure a high level of safety for any transactions.

CNGame Casino is a conceptually new approach to online gambling focused on building trust and ensuring safety for gamers. We analyzed all modern trends in the adult entertainment industry and noticed that an online casino has an infinite potential.

In 2016, the total gross income of online casinos was over \$400 billion worldwide. The geography of the industry is expansive and includes multiple continents with the biggest numbers belonging to North America and China. Traditional online casinos often encounter a variety of structural problems such as dealing with transactions in different currencies and working with clients from different countries.

Imagine the world where these structural problems simply don't exist! The absolute freedom of access of enjoying gambling without inconveniences related to exchanging currencies, slow transactions, and other minute issues often associated with playing in a traditional online casino. This is the world that we want to create!

ABOUT CNGAME CASINO

It all started with a vision: to create a technologically advanced online casino with an expansive catalog of digital entertainments based on the advanced architecture incorporating the philosophy and technology of blockchain. The main priority of the project is safety of online gambling, interactions between the platform and its users, communications, and all other aspects of the service.

By focusing our attention on using advanced hi-tech components and the development of our blockchain infrastructure capable of competing with the most popular tokens out there, we will make our casino one of the best in the world in terms of technology, scalability and transaction speed.

CNGAME CASINO'S MISSION

We strive to create a unique gaming platform featuring applications from the best software providers in the industry. A casino of future — this idea became the philosophical core of the development process for the **CNGame team**.

The global market has a huge potential yet casinos rarely focus on providing the highest level of technological security in regards to financial safety of their clients. Many companies are limited by geographical and political borders.

We are creating a new gaming platform aiming to conquer the world and establish a unified system of financial interactions between casinos and gamers; a system that would not depend on fiat money and international market interactions between nations. To accomplish it, we present you the new **CNG token** for gambling and trading on the **CoinsBit Exchange**.

MARKETING ADVANTAGES

The main goal of our marketing strategy is to attract gamers over the course of the whole lifecycle of the platform while expanding the client base and focusing on client retention by adhering to exceptionally high levels of service and conducting regular updates of the technological resources including new games, services, and products.

On all stages of the development and maintenance, the priority for the **CNGame Casino team** will be nurturing a loyal community through active work on social media platforms and cooperation with partners. Our core audience is comprised of millennials aged from 30 to 45 interested in technologically advanced digital entertainments and capable of appreciating the benefits of total security of financial operations.

Amongst main messages of our marketing campaign:

- **CNGame Casino** is a modern gaming platform with entertaining games.
- The main priority is to provide unmatched levels of safety and freedom of transactions.
- The key feature of the project is its integration of the blockchain technology.
- **CNGame** aims at the global audience.

PROSPECTS OF OUR ONLINE CASINO

We are fully committed to the interests of our investors and partners. The assessment of the online gambling market ensured us that our project is financially viable: **CNGame** will be not just another profitable casino, but a contemporary platform uniting people from all corners of the globe regardless of their nationality, location or available currency.

The CNG token will be in-demand. According to Statista, the volume of the online gambling industry will reach a staggering **\$94 billion in 2024**. Experts believe that over **1.6 billion** people gamble regularly and over **4.2 billion** people gambled at least once last year. The audience is huge and we will be able to attract with a rich catalog of games and the simplicity of transactions. The demand for the token will be justified by the player engagement on the **CNGame** platform and gradual integration of the token in various e-Commerce projects.

The development of the gaming platform will account for future expansions. Conceptually, the token will be implemented by the referral program, and all users participating in the referral program will receive this token. It will only be possible to play on the platform using the **CNG token**. After the end of the referral program, we will not issue a token and all non-distributed tokens will be burned. That is, those who want to play at the casino **CNG** will be able to get them only by purchasing from the token owners.

ADVANTAGES OF THE SYSTEM

One of the biggest advantages of **CNGame Casino** is absence of third parties and middlemen between the platform and its users. The token is used to pay for all services and to play games offered by the **CNGame Casino** platform. The token is also traded on the **CoinsBit Exchange**. Safety and speed of transactions as well as unique opportunities for investment accrual grant us indisputable advantages in the online gambling and digital entertainment industries.

SAFETY OF FINANCIAL TRANSACTIONS

The blockchain technology allows us to guarantee payouts. All transactions are conducted within the system and can be tracked independently from one another. Here are the basics of our security philosophy: guaranteed payouts, the lack of hidden commissions, convenience of the token, and wide integration of blockchain principles.

INDEPENDENCE FROM THIRD PARTIES

Banks and online payment systems do not allow modern casinos to quickly send payments to their clients and create an additional burden in form of added fees and hidden commissions. The **CNGame** Commission speeds up all processes and removes the necessity to employ middlemen. Our players will be able to deposit and withdraw funds automatically without any issues. We will use this advantage to reduce administrative costs and devote all our resources to enhancements of the platform, customer support and maintenance.

PLANETARY SCALE

At the moment, the online gambling market is noticeable segmented. Our goal is to create a global platform accessible from any corner of the world. We will ensure reaching this goal by integrating the blockchain technology and using a token independent from fiat money that rely on national economies.

Instead of limiting the project to a single country, we will create all necessary conditions to attract the global audience of the online gambling industry.

TECHNOLOGICAL SUPERIORITY

The key difference of our service from the rest of the competition is its use of the blockchain technology in as many processes as possible. The integration of cryptographic protection of data ensures maximum data security, anonymity of users, and reliability of the financial system in place.

PRINCIPLES OF WORK

THE BLOCKCHAIN TECHNOLOGY

To play games, you will need the new **CNG token**. It allows us to make the gambling process unique and isolated. Gamers can use the token within the CNGame Casino platform to pay for services and products. Tokens can be instantly cashed out without any hidden commissions and added fees.

The token guarantees that your personal information is protected and transactions are anonymous.

THE INTEGRATION OF COINSBIT EXCHANGE

The initial token distributions will be conducted via CoinsBit referral system and **AirDrop**. All **CNG tokens** will be eligible for use in the **CNGGame Casino** environment, trading on the **CoinsBit** Exchange platform and purchasing goods and services on the internet. We are interested in creating a liquid cryptocurrency intimately connected to the world of online gambling and various online businesses. Such flexibility of the token will grant it certain success on **CoinsBit** and other cryptocurrency exchanges in the future.

APPLICATION AND SUPPORT OF CNG TOKENS

Stability of level of liquidity is important in the ecosystem of any token, first of all. During development of ecosystem of **CNG token** command examined the different models of maintenance of liquidity. On a result was chosen most simple, but from that and maximally effective system. The models of classic, "living" casinos in that chips of casino are by an only method to take part in a game were considered.

The closed ecosystem will be created for this purpose. Only users of **CoinsBit** exchange, that took part in the referral program and participated in **AirDrop** will have the opportunity to play in **CNGGame Casino**. The similar closed will create demand on this coin, taking into account that trades will take place only on the exchange of **Coinsbit**.

In order to "cash" their own winnings, the user needs to sell their winning **CNG tokens** to another user for another crypto, and given that the number of tokens is limited and immediately after the end of the referral program and **AirDrop** extra coins will be burned, it will create a natural deficit of this coin, which will support the demand and, accordingly, the price of the **CNG token**. The casino fund will store enough coins to cover the winnings of users in any case, but it is formed primarily from tokens that are used by users as a payment for the game, which will almost completely eliminate the possibility of depreciation token. Thanks to the closed ecosystem, users will be able to exchange **CNG tokens** for other coins as quickly and cost-effectively as possible.

RANDOM NUMBER GENERATOR

The systems, algorithms and behavioral patterns of the software are, above all, based on ensuring fairness and honesty for all players. As part of the certification process, Random Number Generators are regularly tested and certified by leading industry commissions to ensure reliability, consistency and fairness of the game.

Using the proven experience of various online casinos and their random number generation systems, we chose the crypto-resistant pseudo-random number generator.

The Pseudo-Random Number Generator (PRNG) used by **CNGame Casino** operates at a high level of randomness so that all players can be confident that the game is fair and fair. The **CNGame Casino** Pseudo-Random Number Generator (PRCG) will be under the strict control of special commissions, which will ensure the reliability and confidence in the game.

The most important parameters for our random number generation system are:

- A sufficiently long period of time to ensure that there is no sequence loop within the task at hand. The length of the period must be mathematically proved;
- Efficiency - the speed of the algorithm's operation and low memory consumption;
- Reproducibility - possibility to reproduce the previously generated sequence of numbers any number of times;
- Portability - the same functioning on different equipment and operating systems.

RANDOM NUMBER GENERATOR

The PRNG system will also be cryptographically robust and not only through the use of block-chain technology.

It will meet the specific criteria accordingly:

Passing the "next bit test". The meaning of the test is this: there should not be a polynomial algorithm that, knowing the first values of a random sequence, can predict subsequent ones with a probability of more than 50%. Generators that pass the "next bit test" will pass any other statistical tests for randomness performed in polynomial time.

It will remain reliable even if some or all of its states are known (or have been correctly calculated). This means that it should not be possible to obtain a random sequence created by a generator before the cryptanalyst has obtained this knowledge.

GAMES

In the initial stages, we will use games from proven online casino software vendors. In the future, we plan to integrate the games of our own development, which will be created taking into account the peculiarities of block technology, which will fully immerse in the gameplay with unprecedented excitement.

FULL SCALABILITY

One of the advantages of the blockchain technology is its scalability. We can regulate the size of the platform and its technological resources instantly to quickly react to changes in the online gambling's ecosystem. We do not have any limitations in regards to the number of users on the platform.

The same goes not only for the blockchain infrastructure but also the scale of the casino itself. We will be working with the best software providers such as NetEnt, Yggdrasil, Microgaming, and others to keep the platform up to date with the latest advancements in the industry.

TOKEN DISTRIBUTION

The initial token distribution will be performed via the referral program by CoinsBit. All users registered between 20.02 and 20.05 will receive CNG tokens equal to \$300 in value through an airdrop.

There are five levels of referrals:

- Level 1 (\$300) — **30 000 CNG.**
- Level 2 (\$150) — **15 000 CNG.**
- Level 3 (\$75) — **7 500 CNG.**
- Level 4 (\$50) — **5 000 CNG.**
- Level 5 (\$25) — **2 500 CNG.**

Referrals of the first level automatically become participants of the referral program and can start inviting their friends as well. Referrals invited by your friends of the first level become referrals of the second level and so on down to the fifth level.

You will not only receive CNG tokens but also commissions from all trades conducted by referrals of all levels:

- Level 1 — **25% commission.**
- Level 2 — **15% commission.**
- Level 3 — **10% commission.**
- Level 4 — **5% commission.**
- Level 5 — **3% commission.**

Tokens that will be distributed between the participants of the referral program are limited. After the initial distribution, CNG tokens will be available only through purchase of winning in the CNGame online casino. Tokens will be transferred to participants of the program before June 1.

The total amount of tokens is 500,000,000,000.

Roadmap

FEBRUARY 2019

We get the idea and start working on the concept

AUGUST 2019

The concept and technology feasibility proof

FEBRUARY 2020

Preparing to launch the CNG token

20 FEBRUARY – 20 MAY 2020

CNG token sales through the referral program and AirDrop

20 MAY – 1 JUNE 2020

Preparing to launch the token on the CoinsBit Exchange platform

1 JUNE – 10 JUNE 2020

Launching the CNG token on the CoinsBit Exchange platform

10 JUNE – 1 OCTOBER 2020

Preparing the token for integration into the CNGame Casino platform

SEPTEMBER- OCTOBER 2020

Launch and maintenance of CNGame Casino

DEVELOPERS

The blockchain technology implementation and the development of the technological foundation of the casino are conducted by a team of experienced professionals with a wide support from the **CoinsBit Exchange company**.

DISCLAIMER

Purchasing the token is tied to significant risks. Before purchasing **CNG**, consider informing yourself about possible risks and consult with an advisor in financial, tax, and legal areas.

Within the extent defined by existing laws and regulations, the management and employees of **CNGame Casino** shall not be liable for any losses and damage suffered by the participants of the project resulted from interacting with the token.

The management and employees of **CNGame** shall not be liable for your losses after tokens are transferred to you by any reason including (but not limited to) password loss, hacking or personal data leaks.

The team of developers puts all its efforts in the successful launch and future maintenance of the **CNGame Casino platform**. The participants of the referral program and token holders, by purchasing or otherwise acquiring tokens, understand that the management and employees of the company cannot guarantee the release and success of the **CNGame Casino** and shall not be liable to any damages and losses suffered due to incapacity to use **CNG**.

Governments and international authorities regularly scrutinize crypto tokens and try to implement new regulations. New legal norms, limitations, and laws can disrupt the business model of the **CNGame Casino** in the future. All participants of the project and token holders must understand that the principles and the business model of the platform may significantly change due to external pressure. The management and employees of the company shall not be liable for any changes and disruptions in the platform's operations caused by new laws and limitations in relation to the crypto technology.

DISCLAIMER

This whitepaper and any information about the inner workings and technicalities related to the platform made by the management or employees of the company cannot be considered an invitation to participate in the project or an offering of assets and securities under any jurisdiction. This document does not contain any information that shall be considered a recommendation or advice for any investment decisions.

The management and employees of the company shall not be considered advisors or consultants in matters of law, finances or taxes.

Purchasing or otherwise acquiring tokens in any amount do not grant you any right to govern or otherwise participate in the managerial processes of the company.

The company does not attempt to give warranties in regards to or promise the accuracy, truth, and completeness of any information presented in this document. The management of the company keeps the right to implement any changes, add, remove or otherwise modify parts of the whole content of this document. Token holders and buyers agree to such changes by the means of purchasing or acquiring tokens.
